dalby

large table

design

Your newest old friend. The Dalby table will inject warmth and quality into an interior without raising any eyebrows. Dalby provides a practical, robust surface and maximised leg positions for clear, useable access all round the table. The simple design easily scales across a wide range of sizes from small 3 to 4 people circular tables through to huge meeting tables, to cafe tables and coffee tables. The Dalby table is built from solid materials the good old way and will therefore last as long as it's timeless aesthetic endures.

technical

Dalby table legs are CNC cut and shaped from solid oak and hand finished before receiving a coat of hard wearing matt lacquer. The under table structure is oak veneered and matt lacquered to match. The table frame is component based and is delivered fully dis-assembled for efficient delivery and installation. Dalby table is available with a wide range of table top finishes, from matching oak veneer through to striking coloured laminates. *All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

Dalby table designed by naughtone

general manufacture description

The Dalby table is available in a range of sizes and finishes, for the purpose of this document we have a specific example from the range:

Dalby table with white MFMDf top.
DAL-1600 x 800

Please use the material index and the breakdown of component mass below to establish the environmental qualities of other finish options in this range.

Dalby table legs are CNC cut from solid oak and hand finished before being matt lacquered. The beams are oak veneered and matt lacquered to match. The table frame is component based and is delivered fully disassembled for efficient delivery and installation.

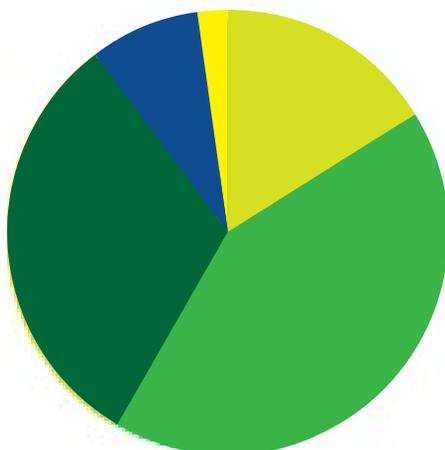

The top is CNC cut and the MDF edge is then matt lacquered.

The top and frame are assembled together by hand using minimal fixings and can be easily disassembled if necessary.

facts

- 100% FSC certified timber
- naughtone is FISP and ISO14001 certified
- 15.5kg Total weight
- 10.1% Recyclable (top plates and fixings)
- 17.87% Recycled content (top plates, fixings, top and beams)
- 89.64% Re-useable (Beams, legs and top)
- 27.97% Recycled & Recyclable content

contents

- Top (MFMDf) - 16.1%
- Legs (solid oak) - 42.4%
- Beams (veneered MDF) - 31.14%
- Top plates (stainless steel) - 8.1%
- Fixings (mild steel) - 2%
