

Betwixt Seating

With their Betwixt Seating family, Ilse Crawford and Oscar Peña of Studiolise created a response to something they struggle to find for themselves: an “everywhere” chair that can move between different environments. Betwixt achieves this versatility thanks to its carefully considered materials, scale and breadth of offer. Betwixt’s steel frame and choice of wooden, upholstered or composite cork seats and backrests provide options for use across multiple settings.

Designer

Studiolise

Benefits

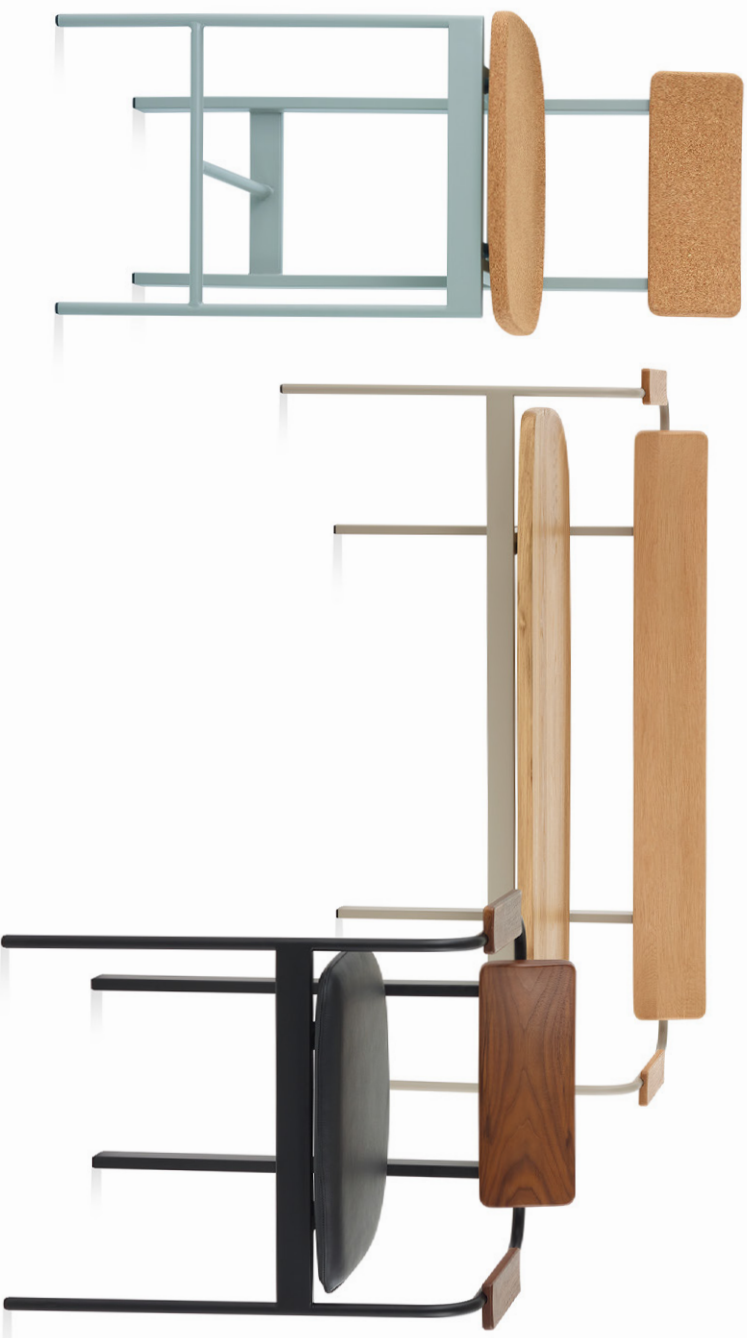

- Betwixt’s versatile aesthetic owes much to the materials in which it can be specified: wood, composite cork, upholstery.
- When positioned under a table, Betwixt blends in with its surroundings and offers clear sight lines thanks to an overall height that is lower than other side chairs.
- Composite cork seats and backrests provide an environmentally responsible material option and a differentiating aesthetic for Betwixt Chairs and Stools.
