

Environmental Product Summary, EMEA

Atlas Storage

Design Story

As work continues to change at a rapid pace, we've created Atlas Office Landscape, a system for the modern era – where ideas flow, and people work best in inspiring environments where their individuality and creativity is encouraged. Atlas is the culmination of all our learning, a comprehensive and flexible system that enables the creation of holistic workplaces for 21st century companies and people.

With a simple set of elements, including single and double units in various heights, Atlas Storage not only enhances various settings by housing work items or personal belongings, it can also create space and define boundaries. The addition of the seat pad provides the perfect place for guests to perch, and the soft, curved aesthetic seamlessly complements both the Atlas and Memo desking portfolios, creating a consistent look across the office landscape.

Herman Miller's Design Protocol

Our commitment to corporate sustainability naturally includes minimising the environmental impact of each of our products. Our Design for Environment team (DfE) applies environmentally sensitive design standards to both new and existing Herman Miller products. The DfE Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in four key areas:

- Material Chemistry and Safety of Input—What chemicals are in the materials we specify, and are they the safest available?
- Disassembly—Can we take products apart at the end of their useful life, to recycle their materials? Recyclability—Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?
- LCA—Have we optimised the product based on the entire life cycle?

Material Content

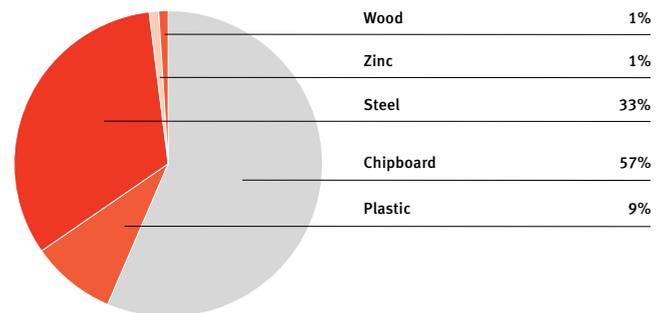

Atlas Storage is constructed from steel, plastic (mixed), chipboard and other materials. Atlas Storage is up to 92 percent recyclable based on the availability of recycling facilities. Atlas Storage comprises approximately 61 percent recycled materials*.

- 33% pre-consumer
- 28% post-consumer

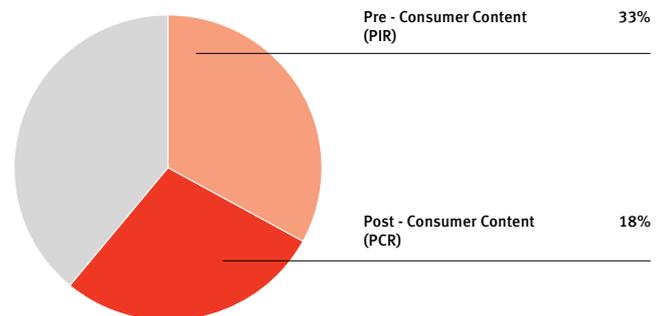

*Based on single door, 54 cm height unit.

Herman Miller products can be disassembled with standard tools thereby allowing reuse, refurbishment, repair and recycling of components. plastic components ≥ 50g are marked with recycling codes where physically possible. Indoor Advantage Gold certification assures that furniture products support a healthy indoor environment by meeting strict chemical emission limits for volatile organic compounds (VOCs).

Corporate Sustainability Policy

For more information on Herman Miller's Corporate Sustainability Policy and other environmental efforts, please visit: hermanmiller.com/environment Herman Miller's UK manufacturing site is certified to ISO 14001 (environment), ISO 9001 (quality) and OHSAS 18001 (health and safety). This product can help you to achieve criteria towards LEED, BREEAM, SKA and WELL building certifications.

Supplier Excellence

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We operate a successful closed-loop packaging scheme with key component suppliers. Wherever possible we segregate reusable packaging and pass it back to the supplier, who in turn reuses the packaging for future deliveries to Herman Miller.
