

Environmental Product Summary, EMEA

Everywhere™ Tables

Design Story

Fine lines. No boundaries.

Everywhere Tables, designed by Dan Grabowski of G2 Product Development, support people as they work and gather. The tables have simple, refined lines that complement any space. Their single aesthetic brings unity and visual calm wherever you choose to place them. Top shapes and finish choices are nearly limitless—and easy to customize. A small kit of parts—tops and legs in various styles and sizes—are used to make many different tables. Fewer components mean less energy is used. The primary materials in Everywhere Tables—wood, steel, and aluminium—are all recyclable at the end of many years of dependable use.

Herman Miller's Design Protocol

Our commitment to corporate sustainability naturally includes minimising the environmental impact of each of our products. Our Design for Environment team (DfE) applies environmentally sensitive design standards to both new and existing Herman Miller products. The DfE Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in four key areas:

- Material Chemistry and Safety of Input—What chemicals are in the materials we specify, and are they the safest available?
- Disassembly—Can we take products apart at the end of their useful life, to recycle their materials?
- Recyclability—Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?
- LCA—Have we optimized the product based on the entire life cycle?

Material Content

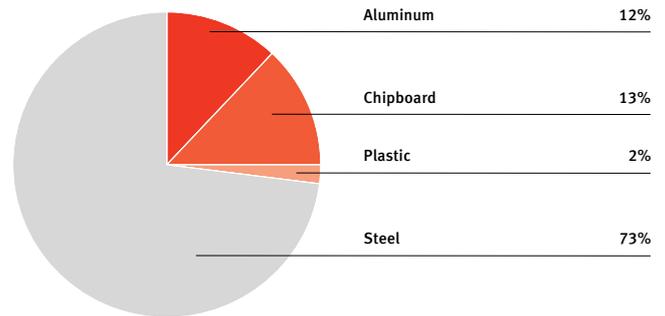

Everywhere Table components are constructed from aluminium, steel, plastic (mixed), chipboard and other materials.

Everywhere Tables are up to 99 percent recyclable based on the availability of recycling facilities. Everywhere Tables comprise approximately 63 percent recycled materials.

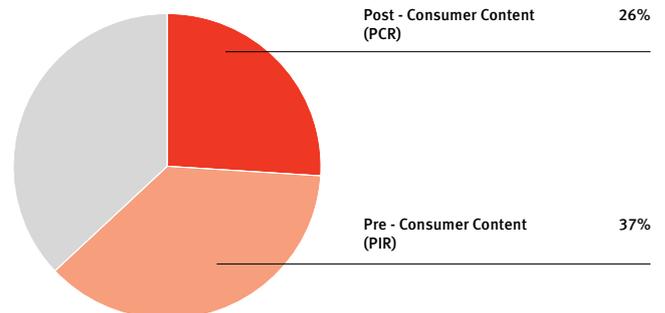

- 26% pre consumer
- 37% post-consumer

Herman Miller products can be disassembled with standard tools thereby allowing reuse, refurbishment, repair and recycling of components. plastic components ≥ 50g are marked with recycling codes where physically possible. Indoor Advantage Gold certification assures that furniture products support a healthy indoor environment by meeting strict chemical emission limits for volatile organic compounds (VOCs).

Corporate Sustainability Policy

For more information on Herman Miller's Corporate Sustainability Policy and other environmental efforts, please visit: hermanmiller.com
Herman Miller's UK manufacturing site is certified to ISO14001 (environment), ISO 9001 (quality) and OHSAS 18001 (health and safety). This product can help you to achieve criteria towards LEED, BREEAM, SKA and WELL building certifications.

Supplier Excellence

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We operate a successful closed-loop packaging scheme with key component suppliers. Wherever possible we segregate reusable packaging and pass it back to the supplier, who in turn reuses the packaging for future deliveries to Herman Miller.
